RUMANIAN WEATHER REPORT, 6 - 13 JANUARY

6 JANUARY -- Universul, No 5, 7 Jan 50

The weather in the western part of Rumania has been fair for the last 24 hours because of the dispersion of the masses of polar air. In the other regions the sky has been partially overcast and the intermittent snow has continued. The winds have been strong in the north, in Moldavia, and along the Danube River. Temperatures have fallen and yesterday's maximum centigrade temperatures were plus 4 degrees in Oltenia and minus 7 degrees in Fredeal; during the night the variations were between minus 19 degrees at Iuluj and Ristrita and minus 2 degrees at Turnu-Severin and Calafat. The 2800 temperatures this morning were minus 1 degree in the southern part of Rumania and minus 12 degrees at Pecuci. The atmospheric pressure varied between 758 millimeters at Potosani and 762 millimeters at Alexandria.

Weather forecast -- There will be very little change in atmospheric pressure, skies will remain overcast, and light, intermittent snow will fall over most of the country. Temperature will probably rise and the wind will be moderate westerly and southwesterly.

7 JANUARY -- Universul, No 6, 8 Jan 50

The weather for the past 24 hours has been changeable with heavily overcast skies in Transylvania and the mountainous regions and partially overcast in the Danube section and Moldavia. There has been snow in the northern half of Rumania. The winds have been strong westerly and southwesterly. The temperatures (centigrade) have been: maximum 10 degrees at Caracal and minus 5 degrees at Cluj; night temperatures have varied between 3 degrees in the Danube region and minus 12 degrees at Cluj and Bistrita. At 0800 today, atmospheric pressure was increasing and varied between 761 millimeters at Calarasi and 765 mm at Timisoara; the 0300 temperature in Oltenia was 6 degrees and in the northern part of the country 10 degrees.

Weather forecast -- Atmospheric pressure will increase 3 - 5 millimeters. The weather will remain variable, with overcast skies. No change in temperature. Moderate westerly winds.

9 JANUARY -- Universul, No 7, 10 Jan 50

Rapid drop in temperature in the eastern part of Rumania has been occasioned by the masses of arctic air from the high-pressure area in northern Europe. There have been gentle, variable winds becoming moderate. Skies have been overcast, with light snows in the mountainous regions. Today's 0800 temperatures (centigrade) varied from plus 2 degrees at Oradea Mare and Lugoj and minus 9 degrees at Sulina; the barometer readings were 767 millimeters at Mangalia and 760 millimeters at Iasi. Yesterday's temperatures were plus 12 degrees at Targu-Jui and minus 1 degree at Iasi; during the night the temperature fell to minus one degree at Turnu-Severin and minus 12 degrees at Iasi.

Weather forecast -- Barometer will fall from 1 to 3 millimeters. The weather will remain unchanged, with overcast skies. Wind will be westerly. Temperature will remain unchanged. Morning fog in the northern half of the country and snow and hail in the mountains.

13 JANUARY -- Universul, No 11, 14 Jan 50

Atmospheric pressure will drop 3 or 4 millimeters and temperature will rise slightly, but will remain freezing in the south and west. Skies will be partially overcast in Banat and Transylvania and clear in the rest of the country. Winds will be variable. Although the temperature is rising, it will be minus 10 degrees centigrade during the night and minus 5 degrees during the day. There will be light, local snowfalls in the western part of Rumania.

Forecast for the next 3 days -- Temperature will rise gradually. Light, local snowfalls will occur in Transylvania.
